

# BUILDING WITH AIRPOP® AND NEOPOR®

## EFFICIENT CONSTRUCTION WITH EPS PRODUCTS

Whether houses, shopping centres or swimming pools.  
We produce shuttering bocks, insulation and  
fillers from airpop® and Neopor® for you.

## EASY TO USE

**airpop®**  
engineered air

airpop® is the new name for Styrofoam®.  
For more information visit [airpop.de](http://airpop.de)

## THE COST-EFFECTIVE BUILDING MATERIAL.

### APPLICATIONS

- Housing bricks
- Swimming pool bricks
- Pour-in insulation
- Insulating plaster
- Insulation products
- Lagging

### BENEFITS

- Cost-effective construction material
- Efficient heat insulation
- Polymeric fire protection
- Lightweight construction
- Easy to use
- Non-toxic and safe to use Stoffe

## PRACTICAL EXAMPLES

### FAST CONSTRUCTION USING SHUTTERING BLOCKS

EPS bricks are very easy to use and provide shuttering and insulation in one.

### ENERGY-EFFICIENT RENOVATION EPS PEARLS

Our pre-foamed EPS (density: 20g/l) is the ideal injection material for the energy-efficient renovation of old buildings – a super-insulator that's flame-resistant, cost-effective and easy to use.
